RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 58 pages. Original publisher: Washington, DC : U. S. Dept. of Justice, Office of Justice Programs, National Institute of Justice, 1998 LC Number: HV8080. P2 S93 1998 OCLC Number: ocm40899432 Subject: Police patrol -- Research -- Methodology. Excerpt: . . . For example, suppose one wishes to measure the amount of public disturbance observed by police serving a given patrol beat. The unit of observation - what is being observed (e. g. , a public disturbance) - must be de-fined in such a way that it can be distinguished from other kinds of events (i. e. , citizens engaged in activities that are not public disturbances). Once the unit of observation is defined and distinguished from the stream of other citizen behaviors that might be observed, the researcher may begin to make decisions about how to obtain a representative sample. Finally, the method of observation does not rely upon that which is being observed but rather is independent of it, thereby making it possible to assess the effects of the method of observation. For example, the researcher does not rely upon the officers report as to whether he or she treated the complain-ant with respect; the researcher makes that observation and judgment. SSO has a number of benefits for the study of public policing. Because researchers observe policing in natural settings, they need not rely upon the accounts of others to learn what happened. In addition to their observations of the police, SSO researchers may draw from observations made by the police of events and even of the researcher accompanying them. Obtained at the scene, these fresh observations by police are difficult to document in any other way. Official reports often fail to give...
