This short book uses the thinking of Creative Systems Theory to take on some of the most important and timely of such questions. Some examples: How do we best understand the times in which we live How do we best understand the human story as a whole Why, at different times in history, has human understanding taken the forms that it has How do we best understand the experience of free will Are the beliefs of science and religion just different or, instead, parts of a larger picture What is our place in the larger scheme of things These questions share a common bond: they are systemic, and systemic in a particular sense we are only beginning to fully grasp. Quick and Dirty Answers describes how the needed answers to these questions are in fact straightforward, indeed rather common sense. What is new and different is that this is a sort of common sense that we are only beginning to be able to get our minds around.
